## **DETAILED ACTION**

### ***Claim Renumbering***

The claim set includes two instances of claims 5 and 6. For examination purposes the claims are renumbered as claims 7 and 8. Original claims 7-13 are thus renumbered as claims 9-15 respectively. Applicant should submit a new listing of claims incorporating these changes.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13 and 15 (as renumbered), drawn to a method of fabricating a VCSEL, classified in class 438, subclass 22.
- II. Claim 14 (as renumbered), drawn to a VCSEL, classified in class 372, subclass 46.013.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the device can be made by a materially different process, for example the second mirror stack and the mesa need not be etched but could be selectively grown.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2828

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
